

Endless possibilities...

1 complete set: The Standard template may be rotated up to 4 positions. Simply decide your preferred position, hang Pre-view template, mark nail locations, remove template, add hardware and hang. It's that simple! The Up the Stairs template can also be rotated 180° if you choose.

2 complete sets: Blend and create any combination of frame groupings. The templates combine seamlessly to provide you with a wide variety of options. Stack templates or use side by side. You can even combine Standard and Up the Stairs templates.

4 complete sets: Guidelines are included on the template to seamlessly combine multiple templates. Even if you stack or join 4 or more **Perfectpicturewall™** systems (in any direction), they will be level and perfectly positioned everytime! (see page 6)

Only a small variety of possible combinations have been shown but you can continue to combine join or stack to fit whatever wall conditions you may encounter.
